Business success is about simply taken action, setting goal, making a plan and working on it everyday. As Gary Vaynerchuk said, "When it all comes down to it, nothing trumps execution"

How does someone become successful in business opportunities in Spain?

Apart from the practical help and support from me and our support team there is three key tips that I will help you to achieve so you become successful running a home based business.

They are.....

- **Be in control of your lead generation:** Having an independent and continues stream of warm leads is a must for success in a home business. If you already have a large social circle then everything will be fine, but if not, I will help with a system I have been using successfully for many years with great results.
- **Learn some new skills:** Starting anything new is about you and the skills and knowledge you already have and what you are willing to learn. The sad truth is that success has nothing to do with joining the top company, the products they market or the business plan they offer. The skills we have will be the X factor between success and failure, so learning is required.
- **Take consistent and daily action:** The key to success in this business is to stop finding the reason why you can't do something, because you don't have the skills, strength or knowledge and concentrate on what you can do and then do it. Then decide what you want and I mean what you really want from your business and take continues and daily actions towards that goal.

The format may seem a bit simplistic, but I have really allowing you the reader to see the overall concept of running a home based business regardless if you are working in Spain as an American or a Brit panicking about Brexit the process is the same.

Why do customers buy your products directly from a distributor?

A good question, because I am often asked, for example, "Do you have a store in Malaga?" and the simple answer is "NO!"

How about on Amazon or eBay?

If you see our products offered on Amazon or eBay the likelihood is that they are not our oils. In fact, it could be dangerous to purchase any essential oils from Amazon or eBay because they may be filled with unwanted fillers and toxic elements.

The bottles may look like a high quality essential oil and the liquid may seem the same as our, but they are just a cheap essential oil or worse. The other issue is, if someone buys from Amazon or eBay, we are not responsible for the oils or any illness caused by the oils.

To purchase high quality therapeutic grade essential oils in Spain you need to order directly from us by using our buy now button on this page which will direct you to our online store.

What are the benefits of being a essential distributor with business opportunities in Spain?

I guess it depends on what someone new to this industry considers as benefits, but for 20€ a new distributor can get an essential oils business with no monthly fee and with the real possibility of making money. I believe starting any business for 20€ is very affordable considering what someone would pay to start a traditional business.

If we put the payment of 20€ into perspective it means we could purchase:

- 1.4 bottles of mid range wine in Spain
- 2.A manicure
- 3.Lunch for two in a cheap restaurant

Unfortunately, none of these will give you a monthly income or offer you a better future, but you will get some instant gratification. Yes, we all love instant gratification, but it don't pay the bills.

What does a new essential oils distributor get for their 20€?

A new distributor gets a free webshop, which can be simply personalized by changing the URL address, the image and the text to tailor it to the new distributors needs. In addition to the webshop, the new distributor gets a back office to administrate and monitor their business.

In addition, they will get free online training and ongoing support by an experienced distributors such as myself as well as others, who will take them throw the business step by step.
